

Welcome to MarkCard Studio

A focused Markdown workspace for creating polished social media cards.

Why MarkCard Studio?

- **Write in Markdown** while layout, color, and pagination happen automatically.
- **Choose a visual theme** for notes, tutorials, product updates, and editorial content.
- **Target any canvas** with presets for portrait, vertical video, square, and custom dimensions.
- **Keep work local** and export PNG, JPG, PDF, or a stitched long image.

Creation workflow

- 01** Write or import Markdown content.
- 02** Choose a platform size and pagination strategy.
- 03** Select a theme, background, and card metadata.
- 04** Export the complete set in the format you need.

Rich content

Capability	Example
Code	Syntax-highlighted snippets
Math	$E = mc^2$
Diagrams	Mermaid flowcharts
Structure	Tables, tasks, callouts, and footnotes

Tasks

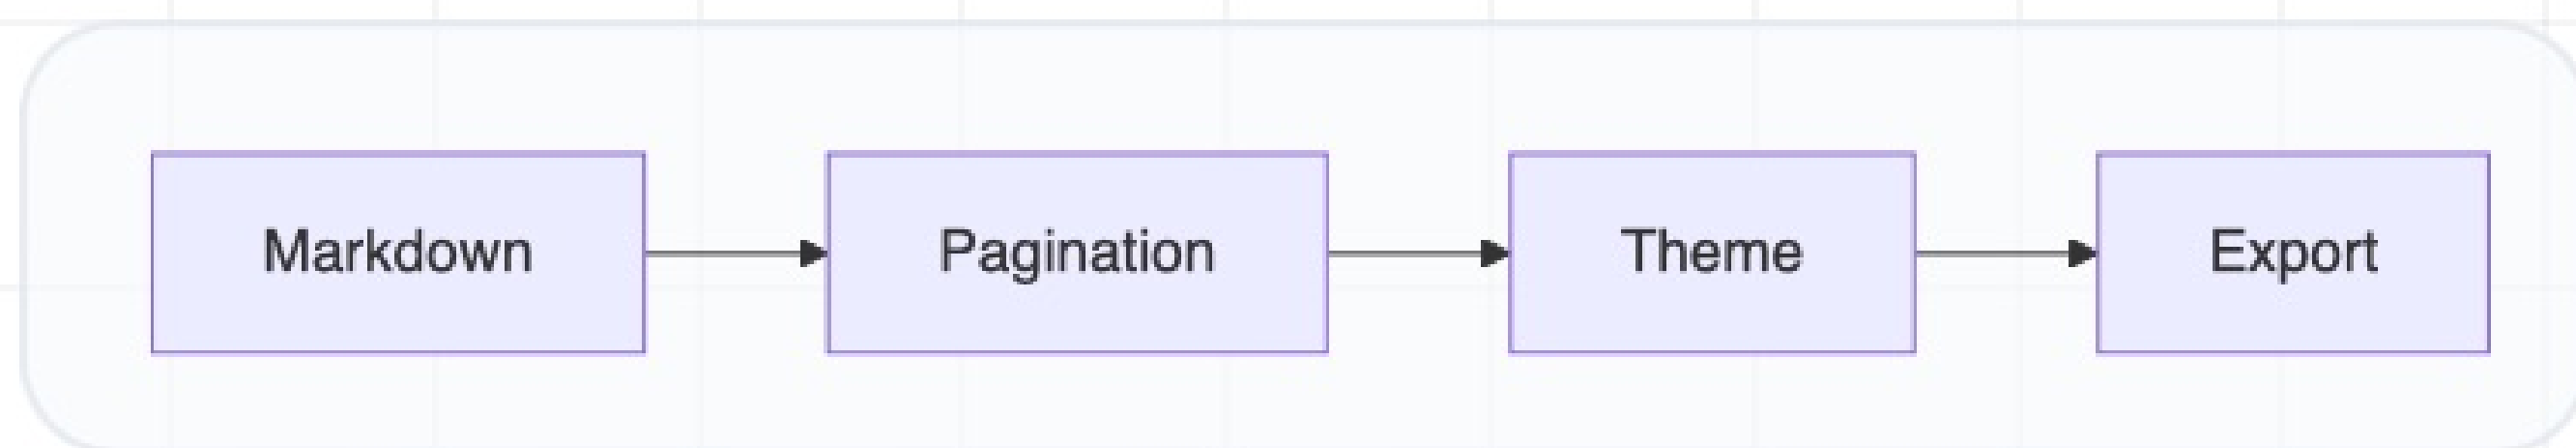

- ☒ ~~Draft the main idea~~
- ☒ ~~Review the generated cards~~
- ☐ Export and publish the finished set

Code example

```
const card = {  
  format: "PNG",  
  ratio: "3:4",  
  quality: "high",  
};
```

JAVASCRIPT

Diagram example

Writing tip

Use headings to create clear card boundaries.

Turn today's idea into something ready to share.
